Synthetic Grinding Coolants Bio-Stable

Clean Wheel synthetic coolants are designed for grinding, including blanchard and carbide grinding. Outstanding chemical lubricity and the high cooling capacity of water makes these products stand out.

Clean Wheel synthetic coolants offer the detergency and rust protection to keep parts and machines clean. Unmatched biostability maximizes these coolants' tank life.

Clean Wheel #410 is ideal for surface grinding as well as a deburring fluid.

Clean Wheel #415 offers the extremely low foam characteristics needed for blanchard grinding as well as the resistance to cobalt leaching needed for carbide grinding.
