High Performance Lubricants For Most Applications

“M” series greases are lithium based greases intended for lubricating in harsh environments. These greases exhibit excellent water resistance, good pumpability and mechanical stability. Applications include lubricating bearings, chains and ways in the following categories.

*Automobiles & Trucks
Industrial Equipment
Agricultural & Textile Machinery*

“M” series of greases are both NLGI #2 greases. The NLGI grade indicates the hardness of the grease. NLGI #1 and #2 are the most common, while NLGI #3 is typically the hardest grease encountered.
