Highly Concentrated For The Worst Jobs

EEZ Products Ultrafinish is a highly concentrated, heavily fortified chlorinated cutting compound for those jobs nobody wants to do. Heavy cuts, slow rpms, high stock removal rates.

EEZ Products Ultrafinish doesn't make the work go faster, but it is more pleasant. The rich gold color, mild odor and low misting tendencies allows for a safer, cleaner workplace. And the exceptionally high additive loading will improve part finish and extend tool life.

EEZ Products Ultrafinish is so heavily concentrated, it can be used as an additive to help the weaklings lurking on your shop shelves. Use up to 20% in any oil to improve overall performance.

If you have to do the job, you might as well do it right.
