Heavy Duty Water Soluble Oil

Bluecool is a heavy duty soluble oil concentrate designed to lubricate and cool effectively over a wide range of applications including grinding, drilling, milling, turning, tapping and threading. At high concentrations or in the neat form, **Bluecool** is suitable for many metalforming operations as well.

Bluecool forms a blue emulsion upon addition to water. This emulsion is hard water stable, offers excellent detergency and rust protection. The balanced Ph keeps irritation risk to a minimum.

Bluecool contains heavy duty extreme pressure additives to extend tool life and improve part finish. For even better hard water stability, try the Bluecool H.
