Chlorinated Drawing Oils

#3600 Drawing Oils are designed for forming of all ferrous and nonferrous metals. Available in a variety of viscosities, these oils will reduce squealing, lower die temperatures, improve part finish and extend die life.

#3600 Drawing Oils contain a combination of chlorine and fat to provide the necessary lubricity and cooling properties. The light color and low odor improves overall shop cleanliness.

#3616 Drawing Oil is the highest viscosity product and is designed for multi-stage drawing. **#3612 Drawing Oil** is an excellent general purpose, all purpose drawing oil. **#3605 Drawing Oil** is lowest viscosity product and should be considered for piercing, blanking, bending and shallow stamping.

Most Popular Product -> #3612 Drawing Oil
