### *Light Duty Evaporative Oils*

**Vanishing Oils** are solvent based products combined with a variety of available additives to improve their lubricity and cooling ability.

**Vanishing Oils** lubricate effectively, but often do not need to be removed afterwards.

**Vanishing Oils** presented here are the #3025 (Light Duty), #3033 (Medium Duty) and #3729 (Heavy Duty). Applications include punching, stamping, bending and piercing. Using the correct Vanishing Oil will improve part finish, extend die life and minimize die pickups.

**Vanishing Oils** are available in four different flash points (110 F—204 F). Higher flash point products dry slower, but are safer to use and easier to dispose of. Low flash point products dry much faster, leaving an absolute minimum amount of film.

Most Popular Product -> #3025 Vanishing Oil
