*Semi-Synthetic Coolants  
High Oil, Less Irritating*

**Supercool #3000** semi-synthetic coolant concentrates are designed for machining ferrous and nonferrous metals over the entire machining spectrum.

**Supercool #3000** coolants are remarkably stable once emulsified into water. The blue emulsion lubricates and cools very effectively, thereby extending tool life and improving part finish.

**Supercool #3000** coolants contain an exceptionally high percentage of oil, which combined with the balanced Ph, minimizes irritation risk.

Most Popular -> Supercool #3094
